Pulse's Racing

MEET THE AWARD-WINNING, INNOVATIVE SEX TOY THAT KNOWS HOW TO THRILL YOU THREE WAYS

PULSE is the future of sex toys, now. Which is a perfectly predictable thing that we would totally say about a product just to hype it. Except this truly is a game changer. Thanks to a piece of scientific ingenuity known as the PulsePlate, PULSE can be used with a partner or without, with an erection or without (try and find another sex toy that caters to guys with ED – or dudes who want to get off while flaccid).

The PulsePlate was inspired by medical research that discovered oscillations administered in a specific way could lead to a better climax for men. Hence why pleasure comes via high-amplitude oscillations delivered to the frenulum (a man's most sensitive area), as opposed to low-amplitude vibrations. This is a technology first for the mainstream men's sex toy market and, better still, PULSE can satisfy with or without lube, so it's like two sex toys-in-one!
